

Corporate Social Responsibility Statement

Brunel Surveys nationally offer a wide range of surveying services for clients who include many major companies and authorities. These surveying services range from land and measured building surveys, through 3d laser scanning, volumetric analysis, drainage, underground utility GPR and CCTV surveys. Brunel Surveys pride themselves on the high quality of their drawings and data, indeed we are confident that our surveys are clearer and more detailed than most of our competitors.

Brunel Surveys recognises their obligations to act responsibly, ethically and with integrity in its dealings with staff, customers, neighbours and the environment as a whole. This will be achieved in the following ways:

- ✓ We shall evaluate key suppliers to ensure they provide goods and services in a socially responsible way
- ✓ We shall identify and source raw materials from sustainable sources where practical to do so
- ✓ We shall respect our employees as individuals and contribute positively to improve their quality of life
- ✓ We will strive to create a pleasant and vibrant environment in which to work
- ✓ We shall play an active role in the local community in which we operate and listen to the views of our neighbours on ways we can enhance our local environment
- ✓ We shall continue to develop employment policies that will attract, retain, develop and reward our high calibre employees
- ✓ We shall continually seek smarter ways to operate to minimise our impact on the environment
- ✓ Our business will be measured not only by its financial success but by the way in which it adds value to the life of our clients, employees and the world in which we live.

At Brunel Surveys we will review our Corporate Social Responsibility Statement on a regular basis and seek feedback from our employees, suppliers and customers on ways that we can continue to improve our performance.
